

# Which hardworking gate is right for you?

We know one of the most stressful, labour-intensive jobs is drafting out cows. It makes a lot of sense to automate this task, particularly when you pair it with cow monitoring.

**\$52,000**  
+gst

## Collar Sorting - Premium **SenseHub® Intelligate-P**

- A larger footprint (compared to Intelligate-S and Protrack draft gates) to ensure optimal cow flow is achieved.
- Designed for maximum cow comfort and accuracy
- Rubber noise softeners
- Sort animals via SenseHub® Dairy monitoring reports, or manual sort via remote control/on gate toggle
- Schedule from pit, paddock or office
- 3 way drafting
- Manufactured using robust, heavy duty premium grade steel
- Manufactured in New Zealand

**\$35,900**  
+gst

## Collar Sorting - Standard **SenseHub® Intelligate-S**

- Intended for smaller spaces and herds
- Sort animals via SenseHub® Dairy monitoring reports, or manual sort via remote control/on gate toggle
- Schedule from pit, paddock or office
- 3 way drafting
- Robust engineering
- Designed and assembled in NZ

**\$49,990**  
+gst

## EID Sorting **Protrack® Gate**

- Suits most yard designs
- Automatic EID sorting
- Integrates with MINDA®
- Cow count and missing cow reports
- Sort animals via Protrack reports, or manually via remote control/on gate toggle
- Schedule from pit, paddock or office
- 3 way drafting
- Robust engineering
- Designed and assembled in NZ
- Optional touchscreen available at extra cost
- Price includes Hub, Draft & Animal modules plus first year Draft & Animal software fees

\*24 months interest free payment terms, 0% deposit.

## Inclusions and Exclusions

When installing a drafting gate, there may be some site-specific and installation requirements to take care of.

Included in the price of the gate is:

- Two year warranty on gate hardware\*. Exclusions apply.
- Gate steelwork, main control, control box, remote control
- ID Unit, Pneumatics kit
- Switches, cables, transmitter & receiver, nuts & bolts
- Training on use will be provided by your local Field Technical Specialist and/or local Training Specialist upon completion of installation

Excluded from the price of the gate is:

- GST
- Compressor
- Any mains electrical, out-of-scope engineering, building modifications or concrete work required for the install
- Internet broadband connection

\* Refer to [sensehub.co.nz/tandc](https://sensehub.co.nz/tandc) for details and exclusions of our warranty, training, install and Authorised Dealer Network.

# Frequently Asked Questions

## Q. How can I use my Farm Source account?

You can charge your draft gate purchase via your Farm Source account and receive Farm Source Reward Dollars. You just need to inform your local SenseHub® Sales Specialist you would like to do this and sign an authority form.

## Q. Do I need internet coverage?

Yes, you need internet coverage at your cow shed. This needs to be arranged by you before installation. We recommend an unlimited plan if your team will likely use it for other tasks.

## Q. Do you integrate with MINDA?

The Protrack® 3G Draft gate integrates with MINDA directly and drafts via EID when you buy the Animal module.

SenseHub® Intelligate seamlessly draft from the SenseHub® Dairy collar and integrates with MINDA via an API.

## Q. Do you integrate with other monitoring systems?

The most seamless system is SenseHub® Dairy Monitoring paired with SenseHub® Intelligate Drafting. This allows you to automate lists in SenseHub® Dairy for drafting, such as on heat.

Protrack® draft gates sort cows via EID, as do many other sort gates. If you are using SenseHub® Dairy monitoring, we can pair and assign the cow collar to the EID tag to connect to drafting. Other monitoring systems may offer something similar.

## Q. Do you integrate with in-shed technology sensors?

Yes, with the SenseHub® Dairy 7 release, which includes our SenseHub® SCC and MilkPlus sensors, you will be able to view milk analysis data at an individual cow level within your SenseHub® Dairy system. Our MilkPlus sensor measures, volume, fat, protein, lactose and blood. Available for both Herringbone and Rotary. Talk to your local SenseHub Sales Specialist for more information on our in-shed milk sensors.

## Q. How long will installation take?

Installation is carried out over a 2-3 day period between milking if your yard does not require other work.

## Q. What size are the gates?

As a guide, the overall gate structure (excluding race length) is approximately:

- **Protrack®** 3.8m L x 1.5m W x 2.2m H; 0.75m W internal race
- **SenseHub® Intelligate-S** 4.1m L x 1.6m W x 2.2m H; 0.8m W internal race
- **SenseHub® Intelligate-P** 5.0m L x 2.2m W x 2.4m H; 0.8m W internal race

For more details on dimensions, please contact your SenseHub Dairy specialist.

## Q. What is 'optimal cow flow'?

Our SenseHub® Intelligate-P draft gate is designed with cow comfort, safety, and accuracy in mind, by utilising a larger footprint (larger than our Intelligate-S and Protrack draft gates) that allows smooth guided travel to achieve optimal cow flow. Our patented saloon gates are designed to be gentle on the cow. Higher draft accuracy is achieved by using the collar identification solution which is less susceptible to interference than other ID systems.

## Q. What do I need to do?

To maintain the warranty\* (and this is recommended) you must get the gate serviced annually before calving. We have an Authorised Dealer Network throughout NZ, who are experienced and knowledgeable with installing and servicing our draft solutions \*. Your local SenseHub® Sales Specialist can put you in touch with your local Authorised Dealer.

## Q. Why choose one of our gates?

- Tried, tested and trusted in NZ pastoral-based farming operations.
- Large locally based sales, training, tech and service desk support team.
- NZ-specific training resources and materials.
- Powered by MSD Animal Health, a global company whose mission is based on the "The Science of Healthier Animals". This means ongoing investment, development and support.
- MSD Animal Health has a large Authorised Dealer Network operating in all of NZ to ensure installation and servicing needs are met as our farmer demand increases.
- A healthy development roadmap focused on delivering a connected ecosystem of data points to improve animal health, farmer wellbeing and ultimately farmers' bottom line.
- Excellent value for money with payment options available.
